Scala Installation
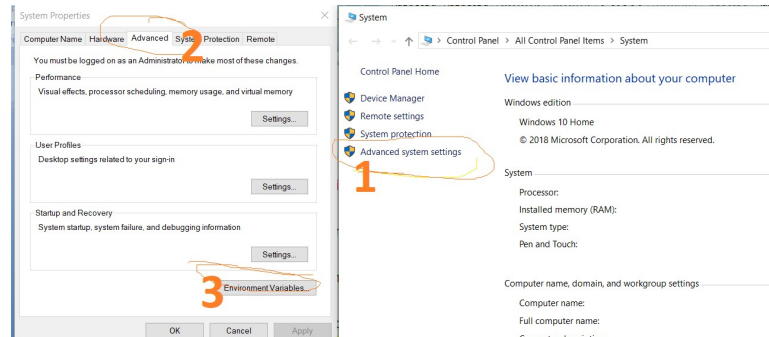

1. Download JVM from cloud "JavaSetup8u151.exe" and install it. Scala runs on top of JVM
   Note: If already installed, skip it
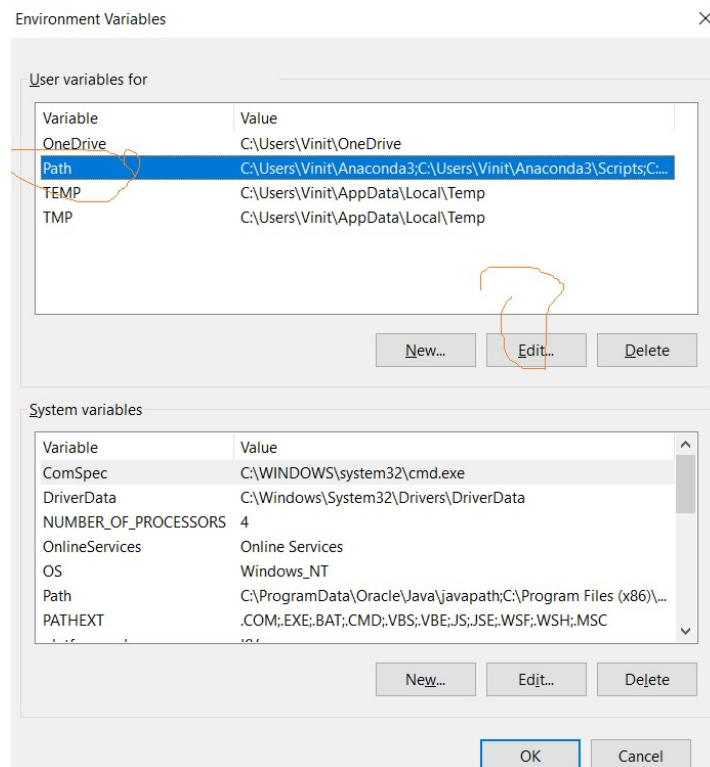

2. Install Scala from cloud "scala-2.10.5.msi" and install it.

3. Set up environment path as below:

   a. Right click on MyComputer/ThisPC>>Properties>>Advance System
   Setting>>Environment Variables

   b. Click on "PATH" and Click on "Edit"

c. In edit user section, place location of bin folder. Note: bin folder location by default is ==“C:\Program Files (x86)\scala\bin”==

4. Write SCALA in command prompt
